The standards stay the same, but
innovation never ends...

This complements and enhances the design of any building. Self supporting aluminium profile, holds the glass with a special fitting which comes with profile. Connector rods are not required and you can install numerous profiles to extend the canopy in desired length.

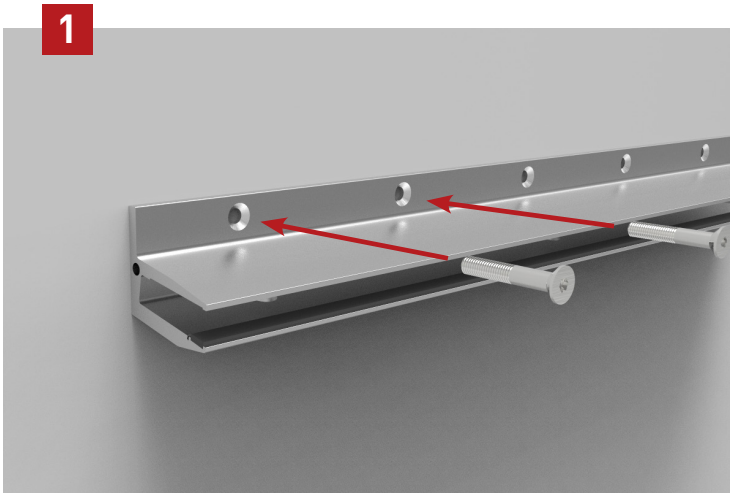
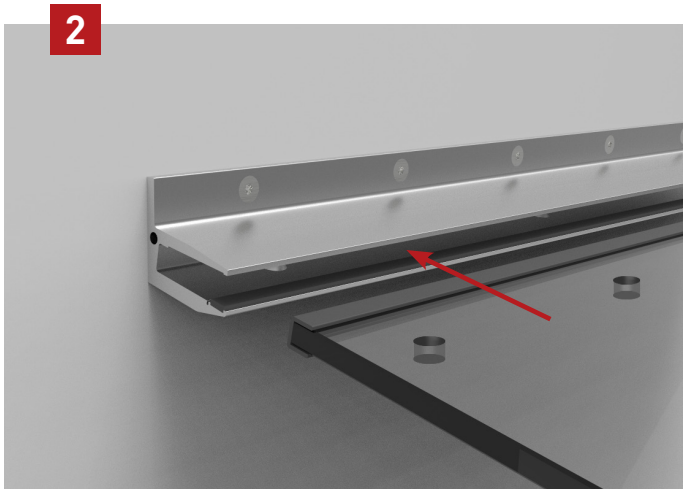
Mount the aluminium profile with appropriate fastening material to the wall.

1



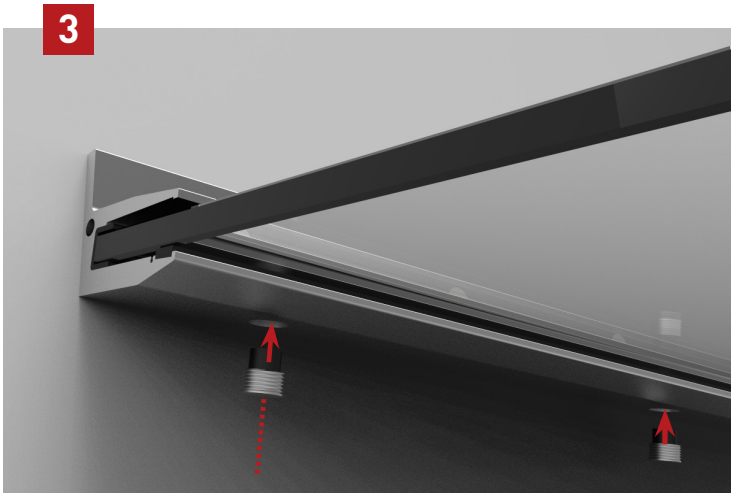
Fit the edge protection rubber onto the glass and then insert the glass into the aluminium profile.

2



Align the glass panel and secure it with glass fixings.

3



Place the endcaps on the profile and secure them with screws.
